WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

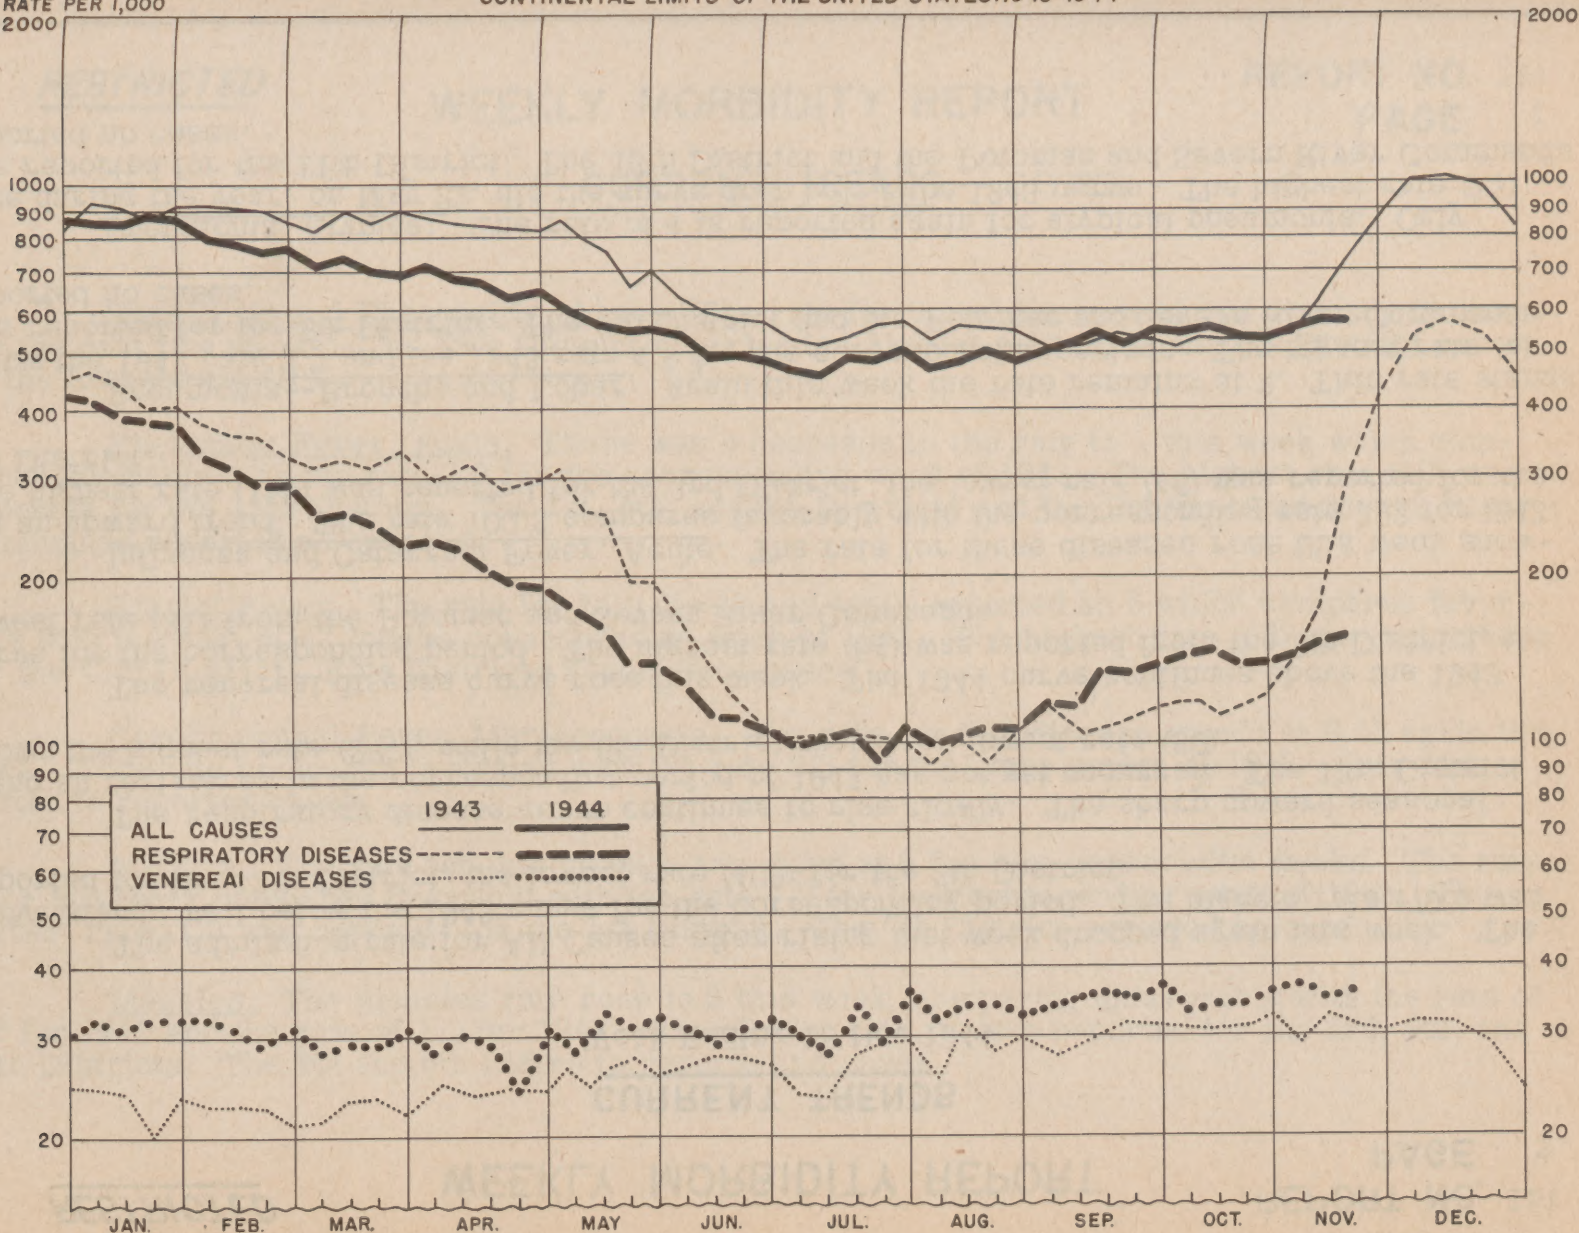

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

CURRENT TRENDS

Week Ending 18 Nov 1944

The admission rate for All Causes after rising last week dropped again this week. The curve stands well below the 1943 curve for the corresponding period. The highest rate (790) was reported for the 13th District, the lowest rate (409) for the 7th District.

The respiratory disease curve continues to rise slowly. The sharp upward seasonal trend as registered in the corresponding period of 1943 has not yet occurred. The 13th District shows the highest rate (277), while the 6th District shows the lowest rate (80).

The venereal disease curve rose this week. The 1944 curve continues above the 1943 curve for the corresponding period. The highest rate (54) was reported from the 8th District, the lowest rate (21) from the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The rate for these diseases rose this week showing an upward trend. The rate 100.3 compares favorably with the corresponding rate 292 for 1943. The highest rate (155) was reported for the 3rd District, the lowest rate (46) was reported for the 7th District.

Pneumonia--Broncho and Lobar. Again this week the rate remains at 2. This rate stands below the 1942 rate 3.7 and the 1943 rate 4.9 for the corresponding periods. The highest rate (5) was reported for the 5th District. The 6th District and the Potomac and Severn River Commands reported no cases.

Pneumonia, Atypical. The rate of 4 is reported again for atypical pneumonia. Only once during the year, on May 22, did the curve drop below the 1943 curve. The highest rate (13) was reported for the 11th District. The 13th District and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS -- CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these diseases shows a steady increase for the past five weeks. The 13th District reported the highest rate (153), the 6th District reported the lowest rate (18).

Rheumatic Fever, Acute. There was a decrease in the rate to 1 this week which compares favorably with the rate 2.9 for the corresponding week of 1943. The highest rate (10) was reported for the 13th District. The 1st, 4th, and 6th Districts and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. The rate for this disease is again reported as 6 which compares favorably with the rate of 12 for the corresponding week of 1943. The highest rate (56) was reported for the 13th District. Five Districts reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this disease stands at 0.13 again this week. This rate compares favorably with the rate 0.3 for the same period of 1943. Only four Districts reported cases.

Malaria. The rate for this disease has stood at 3 for nine consecutive weeks. The rate 3 for this week compares favorably with the rate 4.2 for the corresponding week of 1943. The highest rate (12) was reported for the 1st District. The 7th District reported no cases.

Measles. The measles rate rose to 3 this week, comparing unfavorably with the rate of 2.6 for 1942 and the rate of 1.2 for 1943. The highest rate (5) was reported for the 3rd, 9th, and 12th Districts. The 4th and 6th Districts reported no cases.

RESTRICTED

WEEKLY MORBIDITY REPORT.

REPORT NO. 151
PAGE 5

CURRENT TRENDS --CONTD.

Poliomyelitis, Anterior, Acute. There were no poliomyelitis cases reported this week by Continental Shore Stations. The cumulative total of poliomyelitis cases reported from all Continental stations Jan. 1, to Nov. 18, stands at 72. *

The U. S. Public Health Service reports for this week show the civilian cases in the six States with the highest incidence distributed as follows:

New York	93	California	14
Ohio	24	Massachusetts	13
Pennsylvania	15	Illinois	12

* Several of these cases were not reported on Weekly Morbidity Report NavMed-172.
